

Download php-xml from <http://www.atomicorp.com/wiki/index.php/PHP> .

Step 1) Set up the atomic channel:

```
wget -q -O - http://www.atomicorp.com/installers/atomic | sh
```

Step 2) Upgrade to PHP 5.3.x:

```
yum upgrade
```

Step 3) Replace the PHP 4 php.ini with PHP 5.3.x's (if applicable):

```
mv /etc/php.ini.rpmnew /etc/php.ini
```

Step 4) Replace the php.conf with the PHP 5.3.x php.conf (if applicable):

```
mv /etc/httpd/conf.d/php.conf.rpmnew /etc/httpd/conf.d/php.conf
```

Step 5) Restart the webserver

```
service httpd restart (or) /etc/init.d/httpd restart
```

Download mysql from <http://www.mysql.com> my.cnf

root Administrator
