Plugin	Plugin Name	Severity	IP Address	Protocol	Port	Exploit?
57608	SMB Signing not required	Medium		TCP	445	No

Plugin Text:

Synopsis: Signing is not required on the remote SMB server.

Description: Signing is not required on the remote SMB server. An unauthenticated, remote attacker can exploit this to conduct man-in-the-middle attacks against the SMB server.

Solution: Enforce message signing in the host's configuration. On Windows, this is found in the policy setting 'Microsoft network server: Digitally sign communications (always)'. On Samba, the setting is called 'server signing'. See the 'see also' links for further details.
