**Announcement**: I'm looking for a few news posters. Interested?

CSS Drive : CSS Compressor (Advanced Mode)

Switch to Regular mode.

**Spaces and tabs**
☑ Replace multiple spaces with just one space
☑ Remove space around chars ;:{},
☑ Leave space between selectors
☑ Leave space between properties
☑ Remove tabs

**New lines handling**
○ Leave lines as they are
● Replace multiple empty lines with just one empty line
○ Remove all newlines

**Comment handling**
○ Don't strip any comments
○ Strip ALL comments
● Strip comments at least 4 chars long

**Other options**
☑ Compress color codes where possible
☑ Remove unnecessary semi-colons
☑ One command per line

**Your CSS code:**

若你是網頁設計者，且常常會感覺網頁開啟速度有點延遲或是不夠快的話，那麼有可能是你的 CSS 檔或是 JS 檔案太過龐大 。 此時你便可以透過 CSS Compressor 這項線上工具來為你的 CSS 檔進行壓縮和減肥 。

進到 CSS Compressor 頁面後，你可以看到許許多多的選項，若你覺得這樣太麻煩，那麼可以點選 Regular mode ，該模式下就不需要做太多設定，直接點選壓縮的比例和註解的設定就可以，接著將 CSS 文件所有內容複製並且貼在下方 Insert CSS Code 的位置，按下 Compress-It 就開始進行壓縮 。 接著會顯示出壓縮前的容量與壓縮後的容量差異，你可以決定是否採用壓縮後的 CSS 檔 。
